PROFESSIONAL SUMMARY

Computer Science professional passionate about Artificial Intelligence, Machine Learning, and building real-world intelligent systems. Experienced in developing LLM-powered applications, multi-agent AI workflows, and computer vision solutions using Python, PyTorch, LangGraph, FastAPI, and React.

EDUCATION

SRM Institute of Science and Technology

Jun 2022 – May 2026

B.Tech, Computer Science & Engineering · Chennai, India

WORK EXPERIENCE

Alumnix AI Labs

Full Stack AI Engineer Intern – Jun 2026 - Onwards

Project 1 - Jewellery Stone Detection & Counting

YOLO, Python, PyTorch, OpenCV, FastAPI

- Developed a **Jewellery Stone Detection & Counting** capable of distinguishing white diamonds from colored gemstones in dense necklace designs, accurately detecting **578+ stones** in a single image despite reflections, occlusions, and small object sizes.
- Built computer vision pipelines using **PyTorch, OpenCV, and NumPy** for gemstone localization, classification, and automated inventory estimation.
- Deployed the solution as a production-ready AI application, enabling real-time gemstone detection, counting, and inventory analysis from jewellery images with minimal manual intervention.

Project 2 - AI-Powered Personal Executive Assistant (PEA)

LangGraph, FastAPI, GPT-4o-mini, React 18, MySQL, SQLAlchemy, AWS RDS

- Designed and developed an **AI-Powered Team Workflow & Meeting Manager** using **LangGraph, FastAPI, GPT-4o-mini, React 18, and MySQL**, enabling meeting scheduling, task assignment, progress tracking, and conversational workflow management.
- Led backend agent architecture and database design while implementing a role-based React frontend and cloud-hosted infrastructure using **AWS RDS**.
- Collaborated with cross-functional teams to deploy scalable AI solutions for workflow automation and business productivity.

Spoors Technology Solutions

Generative AI Intern - Mar 2026 – Jun 2026

Python, Claude API, LangChain, React.js, JSP

- Owned end-to-end delivery of **2 enterprise LMS platforms** for live clients architecture, development, testing, and deployment.
- Built a **11-module CRM/LMS** on an SPA architecture, integrating Claude API and LangChain to power in-app AI features for end users.

TECHNICAL SKILLS

Languages: Python, SQL

Generative AI & LLMs: Prompt Engineering, LLM Integration, AI Agents, RAG, Claude API, LangChain, Vector Databases

AI / ML: PyTorch, TensorFlow, Scikit-learn, BERT, LSTM

Databases: PostgreSQL, MySQL

Tools: Git, GitHub, VS Code, Postman, Jupyter, Google Colab, Linux, GitHub Copilot, Cursor AI, Agile/Scrum
