PROFESSIONAL SUMMARY

Enthusiastic AI Full Stack Developer with a strong foundation in Python, machine learning, and software engineering. Experienced in developing AI-driven applications using LLMs, prompt engineering, LangChain, RAG, REST APIs, and modern backend technologies, with a passion for building scalable and intelligent systems.

EDUCATION

Sreenidhi Institute of Science and Technology
Bachelor of Technology - Computer Science Engineering-Data Science

Hyderabad, India
December 2021-2025

WORK EXPERIENCE

Alumnx AI Labs

Full Stack AI Intern – JAN 2026-Onwards

Project 1 - BlueprintAI:Architectural Drawing Analysis & BOQ Estimation

YOLO, Python, PyTorch, OpenCV, Roboflow, Google Colab, Pandas

- Developed a **computer vision**-based architectural analysis system capable of automatically detecting structural elements such as doors, windows, toilets, sinks, and room spaces from floor plan diagrams using **YOLO-based** object detection.
- Built and annotated custom datasets in **Roboflow**, trained and evaluated object detection models using Google Colab, and implemented image processing pipelines with **OpenCV** for accurate feature extraction from architectural drawings.
- Automated **Bill of Quantities (BOQ)** and **Bill of Materials (BOM)** estimation by extracting and aggregating detected structural components, reducing manual quantity takeoff effort and improving construction cost estimation accuracy.

Project 2 - TokenDetective: LLM Cost Monitoring & AI Chat Platform

React, FastAPI, Python, SQLAlchemy, PostgreSQL, Supabase, Firebase, OpenAI, Anthropic, Ollama

- Developed a **full-stack AI chat and observability** platform to monitor token usage, API costs, and model performance across multiple LLM providers including OpenAI, Anthropic, and Ollama.
- Built a **FastAPI backend** with multi-session chat capabilities, a two-layer memory architecture, **PDF-based RAG** using semantic embeddings, and dynamic model switching during active conversations.
- Designed and deployed a **React-based** analytics dashboard featuring real-time token consumption and cost tracking in INR/USD, **Firebase authentication**, role-based admin controls, and organization/user management using **PostgreSQL** and **Supabase**.

Skills Summary

Languages :	MySQL, Python, PostgreSQL.
Web Development :	HTML, CSS, JavaScript, React JS.
Tools :	MS Excel, MS Word, Jupyter Notebooks, Informatica, Power BI, VS code.
Libraries & Frameworks :	Pandas, NumPy, Matplotlib, Seaborn, SciPy, Scikit-learn, TensorFlow (basic), PyTorch (basic).
Soft Skills :	Public Speaking, Leadership, Critical Thinking, Communication, Problem Solving, Analytical Thinking, Time Management.
Artificial Intelligence:	OpenAI API (conceptual), prompt engineering (basic), REST API integration, machine learning, NLP, generative AI (basic exposure), model evaluation, predictive analytics, LangChain, LangGraph, RAG, OpenCV, LLM(Basic).
